

Case Study

# Linton Park School

This independent school premises based in Maidstone, Kent required a crisis management system and CCTV installation.

## Case Study

# Linton Park School

To the casual observer, Linton Park School sits quietly in the scenic Kent countryside, but with the rising incidence of public building attacks, they realised they had to be prepared.

### The Problem

"Our school consists of several timber frame buildings in the style of a collection of traditional farm buildings. At the point of any attack, the students could be in one of many locations outside or inside. We needed a site-wide alerting system to ensure our lockdown procedure was fast and effective."

### The Solution

A Lifebell III system was commissioned by installers Anchor Sound & Security Ltd. The system complemented the CCTV installation with:

- IP speakers internally and externally
- Break glass points activating an immediate alarm tone
- Help points spaced throughout the school
- Control handsets situated in admin offices

### Total Project Cost

£19,870.00

### Project Location

Maidstone, Kent, UK

### System Installed

Lifebell III with CCTV additions
